**\*A Brief Levriero Fly Company Profile:** Levriero Lines s.a.s. was established in the 90s as a *bus operator* for the commercialisation of domestic and international routes, especially those bound for *Malta, Madrid, Dortmund and Barcelona*. Over time, low-cost airlines came into being which made it possible to reach European destinations inexpensively. Having recognised the potential of this trend and thanks to the experience of Levriero Lines management in the world of civil aviation and air transport, Levriero Lines aimed to arrive at solutions which were in keeping with the times. Pursuant to an in-depth, attentive market analysis, a new airline, "*LEVRIERO FLY*", represented by Levriero Lines, was created with the objective of developing and commercialising new routes, the promotion of air transport marketing activities and the analysis and activation of new airline and charter routes at competitive prices. The Trapani Birgi Airport was selected as a base of operations. Within the context of a generalised economic crisis, our company intends to grow and develop by offering our clientele: *safety, reliability, quality and trustworthiness*. The Levriero Fly strategy is based upon non-operative flights from Birgi Trapani airport. Consequently, starting 15 June, the airline will offer daily flights from the city of Trapani to Naples and to important Sicilian islands such as Lampedusa and Pantelleria. Additionally, the company is currently in the process of obtaining the necessary authorisations from ENAC and the Tunisian authorities to operate charter flights between Trapani and Tunis. The objective is to develop a network of flights to and from the Mediterranean area by offering passengers new routes at competitive prices through joint operations with Avies airlines.

**Naples, 21 May, 2009**
