

"A smile for Christmas"

"A smile for Christmas": a holiday event held at 10:00 today for the disabled children at the Buonincontro Centre in Casalnuovo.

Today was a special day for the young day-boarders at the Buonincontro Centre in Casalnuovo: the Centre, with the support of Gesac, organized a Christmas party on a grand scale complete with entertainment provided by the "Paese dei Balocchi" group which included a puppet theatre, clowns, balloons, Father Christmas with presents, candy floss stand and, last but not least, a baby discotheque.

Over forty children with neurological disorders and their families enthusiastically participated in the event.

The "Buonincontro" structure is a National Health service funded, avant-garde, neurological and orthopaedic rehabilitation centre with highly qualified personnel which treats approximately 200 patients per day.

Gesac is committed to promoting and supporting projects in favour of the inhabitants of the communities located near the airport with particular attention to the disadvantaged. This sort of sensitivity to local needs has led to a series of educational, social and cultural activities such as scholarship, theatrical laboratories, summer camps, organized outings for the elderly and assistance to needy families.
